RE: Letter of Recommendation;
Pihl, Inc.

To Whom It May Concern,

Pihl Inc. operated as a subcontractor for the project Progress Ridge Town Square, a shopping and entertainment center in Beaverton, Oregon. Their scope of work on this 14.5 acre project included underground wet utilities, complicated building pads and footings, parking lots and access roadways, sidewalks, demolition, off site road improvements, traffic control, and other related site work. The management team at Pihl Inc was a pleasure to work with and communicated very effectively over the course of the project.

The company had the resources and versatility to keep up with the demand of the project's deadlines and they responded efficiently to each request.

Pihl's staff did an exemplary job managing their crews and communicating with the other subcontractors on site. They're sense of teamwork and leadership helped with productivity and execution. Pihl's positive relationship with the local governments was an asset on this project.

Additionally, Pihl's jobsite was kept neat and most importantly safe. They followed safety protocols and instituted internal controls to promote a safe working environment. Furthermore, their office staff was a pleasure to work with and always available to answer questions.

I would recommend Pihl Inc. without reservation for future projects.

Sincerely,

James J. Schmid
